# Cut and Paste

DID YOU KNOW . . . *that you can cut, copy and paste text through the Windows Clipboard?*

What Cut and Paste Gives You
- *Quickly and easily move text between TNT and your Windows applications*
- *Paste data directly into TNT database tables*
- *Collect metadata from external documents; even from Web pages*
- *Copy and paste text between multiple TNT processes*
- *Simple right-button pop-up mouse menus for all editable text*
- *The X Selection is automatically copied to the Windows clipboard*

The right mouse button pops up an edit menu for clipboard operations

Cut, Copy, and Paste

The mouse button editing tools in your Windows apps access the clipboard.

How Clipboard Cut and Paste Works
- *From TNT: Click the right mouse button on any editable text to open TNT's popup edit menu.*
- *From Windows: select and copy text to and from the clipboard as always.*
- *From other X Clients:*
  Click the right mouse button on the MI/X icon in the Windows System Tray to open the MI/X menu.
  Select **Copy X Selection to Windows Clipboard** *to copy selected text from the X Client to the clipboard.*
  Select **Make Windows Clipboard the Primary Selection** *and then use the client's Paste command to move text from the Clipboard to the X client.*
