

# Save Scripts with Groups/Layouts

**DID YOU KNOW . . .** you can save custom tools and operations with groups and layouts?

## What Saving Scripts with Groups/Layouts Gives You

- Macro, Tool, and Control Scripts available when open Group/Layout
- Use data-specific custom tools from icon button on toolbar
- Scripts work with objects in a specific, opened group/layout as designed
- Scripts and tools can be automatically embedded for use in TNTAtlas

When Tool or Macro Scripts require specific data, save them with a group or layout that contains that data. Control Scripts are always saved as part of a group or layout.

Sample GraphTips produced by Control Scripts for different layouts (above). Scripts can reference specific data or the bottom/top layer in the group/layout.

The screenshot shows the TNTAtlas software interface. On the left is a 'Property Viewer' window with a 'custom tool' layout. The layout includes layers for 'Parcels', 'Floodplains', 'StreetLabels', 'MajorStreets', 'MinorStreets', 'Lincoln Schools', 'County Schools', 'Historic Districts', 'Bicycle/Pedestrian', 'Unstreet Bicycle Tr', 'Future County Trail', 'School Districts', 'LancasterCities', 'Townships', 'LincolnOrtho', and 'Elevation'. The main window displays an aerial map of a residential area. A 'Property Finder' window is open, showing a table of properties:

Number	Prefix	Street Name	Type
1937	Ring		Ring
1440	H	Pioneers	BLVD
555	S	10	ST

Below the table is a 'Search Status:' field and 'Search', 'Close', and 'Help' buttons. A 'Real Estate Property Details' window is also open, showing information for 1937 F ST:

**Real Estate Property Details**  
Address: 1937 F ST  
Owner: BRAMMEIER, MATTHEW C & CYNTHIA  
Owner Occupied: Yes  
Owner City: LINCOLN, NE  
Assessed Value: \$357,200  
Parcel ID: 10-25-310-001-000  
Acreage: 0.859187 acres  
Floodplain: not in floodplains  
Historic District: Clark-Leonard Dist  
School District: Lincoln Public Schools  
City/Town: Lincoln  
Township: Garfield  
Elevation: 1200 feet

This layout uses a Tool Script to find properties, which requires the Parcels layer, and a Control Script to provide enhanced DataTips using the floodplain layer.

## How to Save Scripts with Groups/Layouts

- Choose Use with: This group/layout only for Macro/Tool Script parameters.
- Choose Group or Layout/Edit Control Script and type in or open custom script.
- Save group or layout.
