

Click to View a Map from a TNT Layout

DID YOU KNOW . . . you can automatically display a map layout by clicking on a TNT layout object?

What Clicking to View a Map from a TNT Layout Gives You

- Auto-open a TNT product to display a map layout
- Automatic display of groups and layers that are contained in a map layout
- Ability to add additional groups or layers to the opened map layout

Double-click on a map layout to open it in a 2D View.

If you double-click on additional map layouts they will be displayed in different Views.

How to Click to View a Map from a TNT Layout

- Choose *Tools / System / Preferences* to enable TNT Explorer.
- Browse inside a Project File (*.rvc file).
- Double-click on a TNT object that represents a map layout.
- View map layout and associated attributes in a 2D Display window.
