

Click to View an Object in FREE TNTAtlas

DRAFT 10 FEBRUARY 2006

DID YOU KNOW . . . you can open TNTAtlas by clicking on a TNT object in a Project File?

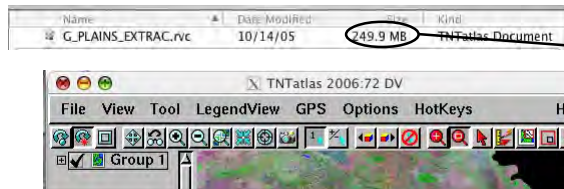

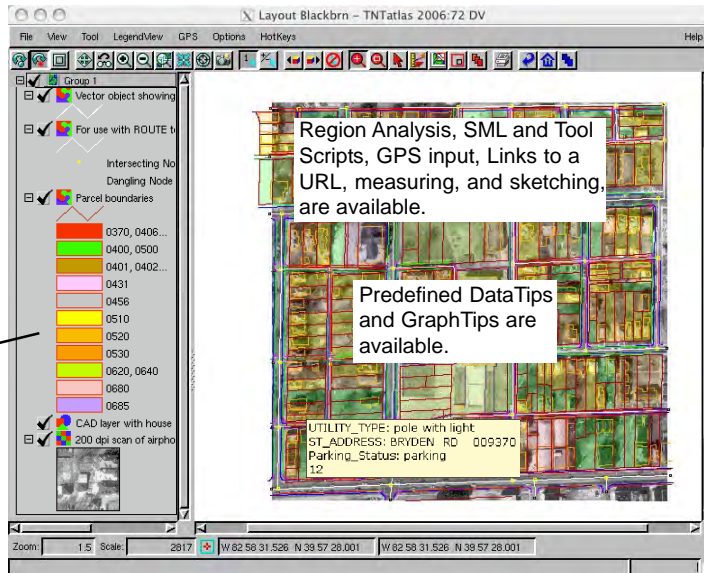

What Clicking to View an Object in FREE TNTAtlas Gives You

- FREE TNTAtlas opens automatically if there is not another TNT product installed
- Open an object of any size with all built-in features in TNTAtlas
- Get full TNTAtlas geospatial analysis capabilities
- Auto-open a single object, group, or layout in a TNT Project File

Automatic display of a map layout in TNTAtlas.

Auto-open of TNTAtlas is available for Windows XP with Service Pack 1 and newer OSs.

All geometric and raster objects contained in the layout are displayed by double-clicking on the object. A group works in the same manner.

There are no size restrictions for files or objects in TNTAtlas.

How to Click to View an Object in FREE TNTAtlas

- Install FREE TNTAtlas on a Windows platform.
- Double-click on a single TNT object contained in a Project File.
- View the TNT object (single object, group, or layout) and associated attributes.
